REQUIREMENT RR/HTA/E/R19/57: Describe changes since World War II  
in the Ungeny Railroad Station, Yards and Shops.

REMARKS:

The Ungeny Railroad Station, Yards, and Shops, located in south west  
European USSR just east of the Rumanian-USSR border, is reported to be a  
change-of-gauge site on the Kishinev-Ungeny-Iasi rail line.

A comparison of [REDACTED] photography with that of [REDACTED] reveals that there  
has been a significant increase in the amount and scope of activity at this in-  
stallation. Though quality and scale of the [REDACTED] photography preclude a detailed  
analysis, it is evident that the trackage has been nearly doubled and several  
new buildings have been added. Also, a small classification yard, four to  
eight tracks wide, and several buildings have been constructed 1.3 miles north  
of the main yard.
